

SCRATCH/MY/BACK

Product Sheet Model W

Description

The model W plate fits the format wah wah pedals like Dunlop cry baby. (A lot of wah wah pedal are on this same format)

For the list of pedals already validated go to the page:

<http://scratchmyback.fr/en/pedals-compatibility/>

CONTENTS : 1 Scratch/My/Back plate model W in aluminium with Velcro

+ 4 countersunk screws

+ 3.94 inch of Velcro self-adhesive.

Apparence

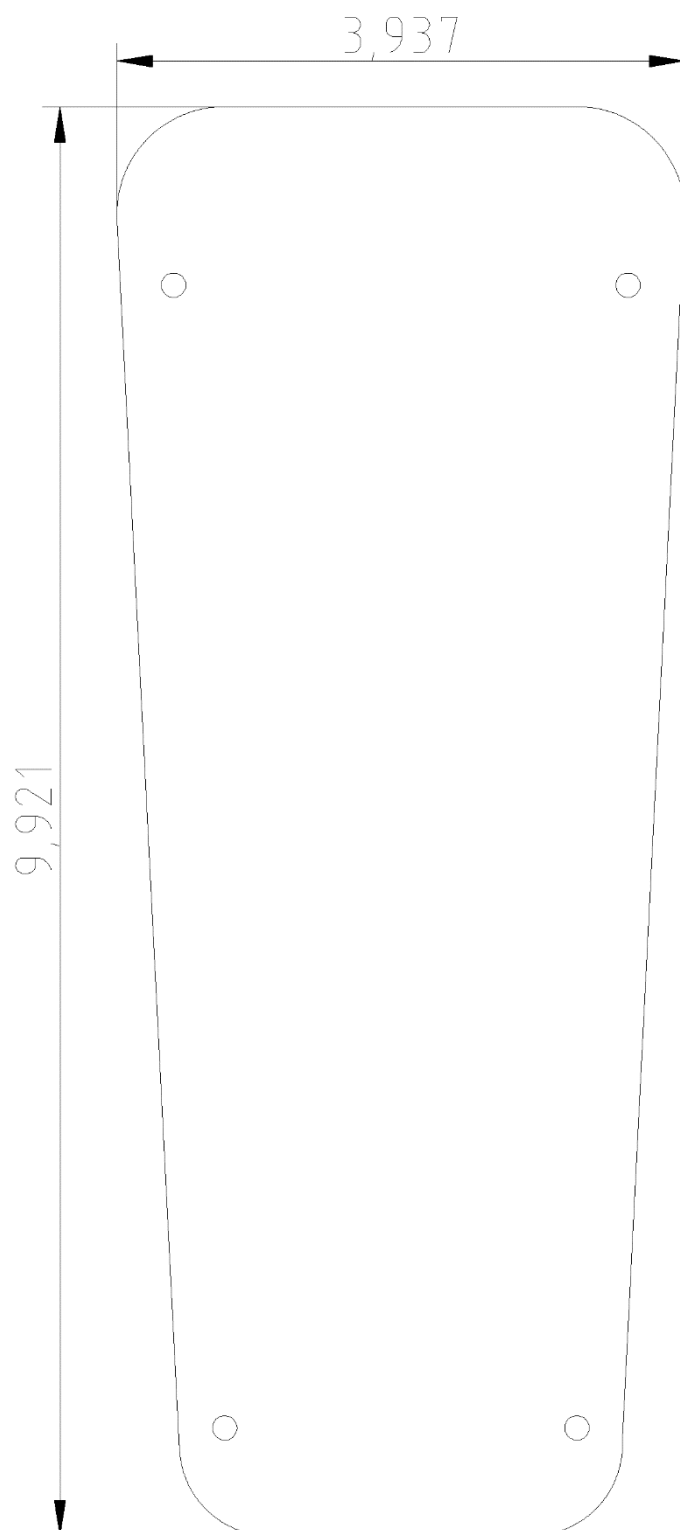

Dimensions

This visual is not at all scaled, if you want to have a scale diagram go to this link that will allow you to print a template to scale, cut and validate compatibility support with your pedal.

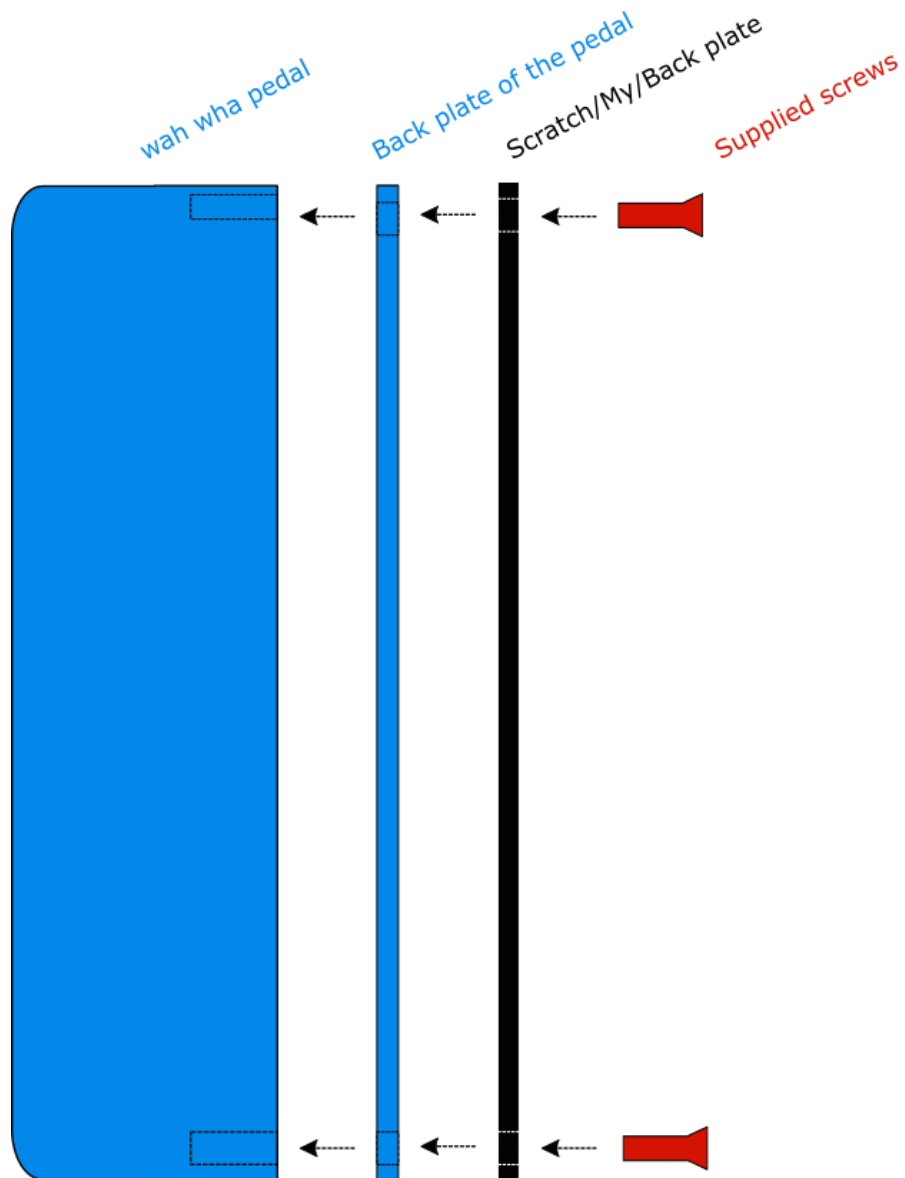

<http://scratchmyback.fr/wp-content/uploads/Template-W-EN.pdf>

Installation

Simply replace the back plate of your pedal and reuse the original screws to put Scratch/My/Back support instead.

Do not excessively tighten the screws will prevent deformation or breakage of the aluminum plate where there is little space between the plate and the screw holes of the pedal.

Assembly tips :

Use the supplied screws instead of the original screws (for more Velcro grip)

Direct access to the battery will no longer be possible. If you use a battery you can put double-sided tape inside the Scratch/My/Back plate or inside the pedal to stabilize the battery without any problem.

If you notice a lack of grip (had little presence of female velcro on your pedalboard where the male Velcro is on the plate) Cut the extra velcro strip as you please to make several pieces and place the left and to the right of the Velcro band already present.

If you notice a rocking movement from left to right too pronounced, cut the extra Velcro strip as you please to make several pieces and place them, but without sticking to the plate so that you no longer see movement and stall your pedal (without having too much grip).

Compatibility

- Pour confirmer la compatibilité du support avec votre pédale d'effet il vous suffit d'aller sur notre site internet où sont référencées les pédales déjà validées :

<http://scratchmyback.fr/fr/pedales-compatibles/>

- Si votre pédale ne s'y trouve pas, pas de panique allez sur la page suivante qui vous fournira un template à imprimer pour vérifier manuellement la compatibilité du support :
